*OECD Multi-level Governance Studies The Future of Regional Development and Public Investment in Wales, United Kingdom* OECD 2020-09-17 The Welsh Government has set an ambitious and innovative path for regional development and public investment - one focused on generating growth and increasing productivity, while also reducing territorial disparities and ensuring the well-being of citizens, now and in the future. Yet, it faces significant challenges, accentuated by limited fiscal decentralisation and changes to public investment financing post-Brexit.

Essentials of Mini - One Anastomosis Gastric Bypass Mervyn Deitel 2018-05-15 This book indicates the technique and fine points of the mini- and one-anastomosis gastric bypass, and looks at the means of revising other operations related to it. The chapters discuss postoperative complications, treatment and requirements, postoperative diet and medications, the remarkable effects on the co-morbidities of morbid obesity, and the durability of the weight loss, as well as the improvement in the quality of life. Essentials of Mini - One Anastomosis Gastric Bypass aims to help surgeons manage the difficulties encountered within this procedure and to help create improved practice.

**Undercover Reporting** Brooke Kroeger 2012-08-31 In her provocative book, Brooke Kroeger argues for a reconsideration of the place of oft-maligned journalistic practices. While it may seem paradoxical, much of the valuable journalism in the past century and a half has emerged from undercover investigations that employed subterfuge or deception to expose wrong. Kroeger asserts that undercover work is not a separate world, but rather it embodies a central discipline of good reporting—the ability to extract significant information or to create indelible, real-time descriptions of hard-to-penetrate institutions or social situations that deserve the public's attention. Together with a companion website that gathers some of the best investigative work of the past century, Undercover Reporting serves as a rallying call for an endangered aspect of the journalistic endeavor.

**Fuel Cell Handbook (Seventh Edition)** EG & G Technical Services 2016-05-08 Fuel cells are one of the cleanest and most efficient technologies for generating electricity. Since there is no combustion, there are none of the pollutants commonly produced by boilers and furnaces. For systems designed to consume hydrogen directly, the only products are electricity, water and heat. Fuel cells are an important technology for a potentially wide variety of applications including on-site electric power for households and commercial buildings; supplemental or auxiliary power to support car, truck and aircraft systems; power for personal, mass and commercial transportation; and the modular addition by utilities of new power generation closely tailored to meet growth in power consumption. These applications will be in a large number of industries worldwide. In this Seventh Edition of the Fuel Cell Handbook, we have discussed the Solid State Energy Conversion Alliance Program (SECA) activities. In addition, individual fuel cell technologies and other supporting materials have been updated.

The First Hundred Years of the Bureau of Labor Statistics Joseph P. Goldberg 1985 The Bureau of Labor Statistics' early work included studies of depressions, tariffs, immigrants, and alcoholism and many assignments to investigate and mediate disputes between labor and management. The Bureau of Labor in the Department of the

Interior was created on June 26, 1884 as the culmination of almost two decades of advocacy by labor organizations that wanted government help in publicizing and improving the status of the growing industrial labor force.

Mental Health Stigma in the Military Joie D. Acosta 2014 This report assesses the U.S. military's approach to reducing stigma for mental health disorders and their treatment, how well it is working, and how it might be improved. It presents priorities for program and policy development and research and evaluation to get service members the treatment they need as efficiently and effectively as possible.

*Utah Beach to Cherbourg (6 June - 27 June 1944)*. Roland G. Ruppenthal 1948

The Death and Life of Great American Cities Jane Jacobs 2016-11-17 In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

**Language, Society and Power** Annabelle Mooney 2010-12-14 Language, Society and Power is the essential introductory text for students studying language in a variety of social contexts. This book examines the ways in which language functions, how it influences thought and how it varies according to age, ethnicity, class and gender. It seeks to answer such questions as: How can a language reflect the status of children and older people? Do men and women talk differently? How can our use of language mark our ethnic identity? It also looks at language use in politics and the media and investigates how language affects and constructs our identities, exploring notions of correctness and attitudes towards language use. This third edition of this bestselling book has been completely revised to include recent developments in theory and research and offers the following features: a range of new and

engaging international examples drawn from everyday life: beauty advertisements, conversation transcripts, newspaper headlines reporting on asylum seekers, language themed cartoons, and excerpts from the television programme South Park and satirical news website The Onion new activities designed to give students a real understanding of the topic a new chapter covering 'Student Projects' - giving readers suggestions on how to further explore the topics covered in the book updated and expanded further reading sections for each chapter and a glossary. While it can be used as a stand-alone text, this edition of Language, Society and Power has also been fully cross-referenced with the new companion title: The Language, Society and Power Reader. Together these books provide the complete resource for students of English language and linguistics, media, communication, cultural studies, sociology and psychology.

**The Murder of Rosa Luxemburg** Klaus Gietinger 2019-01-29 On the tracks of the killers of Rosa Luxemburg The cold-blooded murder of revolutionary icons Rosa Luxemburg and Karl Liebknecht in the pitched political battles of post-WWI Germany marks one of the greatest tragedies of the 20th century. No other political assassination inflamed popular passions and transformed Germany's political climate as that killing in the night of 15-16 January 1919 in front of the luxurious Hotel Eden. It not only cut short the lives of two of the country's most brilliant political leaders, but also inaugurated a series of further political assassinations designed to snuff out the revolutionary flame and, ultimately, pave the way for the ultra-reactionary forces that would take power in 1933. To commemorate the 100th anniversary of their untimely deaths, Klaus Gietinger has carefully reconstructed the events on that fateful night, digging deep into the archives to identify who exactly was responsible for the murder, and what forces in high-placed positions had a hand in facilitating it and protecting the culprits.

Red Sky Over Dartmoor Tony Rea 2017-06-13 On a September morning in 1920, beneath a striking, vividly red sky, three ex-soldiers meet in a sleepy Devonshire village. One of them is soon to die. Red Sky Over Dartmoor is a fast-moving war novel, featuring everyday heroism and moral failure. Marc Bergeron is a Canadian artillery captain who just can't keep out of trouble. His gritty sidekick, Bombardier Ryan, is a wiry Irishman with a reputation for fist fighting and deadly accuracy with a Mauser pistol. Whilst fighting in France, Bergeron encounters the incompetent Major Cross and the deplorable Captain Wadham, both of whom have an axe to grind with one of their NCOs. When two suspicious deaths occur, Bergeron is determined to find those responsible and ensure that justice is served. Tony's debut novel contains meticulously researched historical references, complimented by brief historical endnotes which separate fact from fiction. The fast-paced battle scenes are interspersed with post-war events in south Devon, helping readers to observe the effects of war on all those involved. Red Sky Over Dartmoor is a unique book that will appeal to fans of historical and war fiction, as well as those with an interest in Devon.

**The Roswell Report** Richard L. Weaver 1997-11 This is the official U.S. Air Force report that provides information regarding an alleged crash of an unidentified flying object (UFO) that occurred in the desert near Roswell, New Mexico in July 1947, that is popularly know as the Roswell Incident. The Air Force's explanation for the Roswell Incident is Project Mogul, the top-priority classified project of balloon-borne experiments. 100's of photos, charts, tables and graphs; some for the first time anywhere. Actual sources are reproduced. Highly controversial; this report received extensive media attention. Many people think the report is a hoax. Read it yourself and decide.

*Touch in the Helping Professions* Martin Rovers 2018-04-10 Touch may well be one of the least understood or talked about subjects in the helping professions. A discussion on the importance and ethics of positive, caring, and appropriate touch in professions such as teaching, nursing and counselling is long overdue. Touch in the Helping Professions delivers just that, weaving

together scholarly evidence, research and clinical practice from a wide range of perspectives encompassing philosophy, theology, psychology, and anthropology to challenge assumptions about the role of touch in the helping professions. The contributors to the volume focus not only on the overarching roles of gender, age, culture and life experience, but go beyond to encompass canine-assisted therapy, touch deprivation, sacred objects, as well as key ethical considerations. The prevailing lack of dialogue, due to fear of contravening ethical boundaries, has stood in the way of an open and responsible discussion on the use of touch in therapy. Touch in the Helping Professions is a welcome and much needed contribution to the field—a window onto a fundamental need. This book is published in English. - Cet ouvrage offre un ensemble de données probantes et de résultats cliniques à l'appui du toucher dans le développement physique et émotionnel. Il est structuré selon trois axes : la théorie sur le toucher; la pratique du toucher dans un contexte de thérapie, et les questions éthiques. Il aborde la question du rôle du genre, de l'âge, de la culture et de l'expérience de vie, des sujets comme la zoothérapie, la privation sensorielle, des objets sacrés, et des considérations d'ordre éthique. Les approches variées - philosophie, théologie, psychologie, anthropologie - remettent en question les présuppositions, offrent un contexte historico-culturel professionnel, et font appel à des données primaires. Les collaborateurs soutiennent que le toucher sain et non sexuel n'est pas suffisamment enseigné dans le cadre de la formation professionnelle. Cette absence de dialogue - engendrée par la crainte de dépasser des bornes éthiques, fait en sorte qu'une discussion ouverte et responsable sur l'utilisation du toucher dans un cadre thérapeutique ne peut avoir lieu, alors même qu'elle contribuerait aux balises théoriques de notre compréhension de cet enjeu fondamental. Ce livre est publié en anglais.

Transforming Research Methods in the Social Sciences Angelo Flynn 2019-03-01 Social science researchers in the global South, and in South Africa particularly, utilise research methods in innovative ways in order to respond to contexts characterised by diversity, racial and political tensions, socioeconomic disparities and gender inequalities. These methods often remain undocumented - a gap that this book starts to address. Written by experts from various methodological fields, Transforming Research Methods in the Social Sciences is a comprehensive collation of original essays and cutting-edge research that demonstrates the variety of novel techniques and research methods available to researchers responding to these context-bound issues. It is particularly relevant for study and research in the fields of applied psychology, sociology, ethnography, biography and anthropology. In addition to their unique combination of conceptual and application issues, the chapters also include discussions on ethical considerations relevant to the method in similar global South contexts. Transforming Research Methods in the Social Sciences has much to offer to researchers, professionals and others involved in social science research both locally and internationally.

**A History of Moravian Missions** J. E. Hutton 2017-10-14 This is an original reprinting of the official Moravian missions history with new maps detailing their numerous missionary journeys. This printing is the first of three volumes, and covers the initial years of Moravian missions. Get beyond the myth and pulpit folklore about the Moravians and see what God really did in using this group of believers to bring the Gospel to unreached people groups around the world in the 17th and 18th centuries. This band of refugees, displaced by Catholic persecutions in their own land, found safety with the benevolent Count Zinzendorf in Herrnhut, Germany. After the group experienced a true Holy Spirit revival, Count Zinzendorf found in them a zealous band of dedicated missionaries that carried the Gospel across the world while those back home maintained an unbroken, 24/7 prayer meeting for a hundred years. Just as remarkable is that the Moravians went out with no steady financial

support. They were 'tentmakers' in most places they went to enable the rapid spread of workers without reliance on a large home financial support network. The Moravians are among the most significant, and least known, influencers of the modern missions movement that began in the 1700s and continues to today. John Wesley, founder of the Methodist church, witnessed the Moravians during his fateful voyage across the Atlantic, later attributing Moravian influence to his own conversion. William Carey, considered the father of modern missions and a pioneer in bringing the Gospel to India, attributed his initial impetus for missions after reading about the activity of the Moravians. How did God use a band of largely uneducated craftsman and farmers to reach the world? You should read this definitive history of the Moravians to find out!

**The British Army and Jewish Insurgency in Palestine, 1945-47** David A. Charters 1989-06-12 The first comprehensive scholarly study of the British Army's campaign against the Jewish insurgency in postwar Palestine, this book shows how outdated doctrine, traditional resistance to change, and postwar turbulence hampered the army's efforts to modify its counter-insurgency tactics. It also shows why the security forces failed to develop intelligence sufficient to defeat the insurgents.

*Clinical Futures* Michael Peckham 1998-12-04 Clinical Futures considers the future of health care from a different perspective: from the point of view of potential developments in the clinical sciences over the coming fifty years. It examines the interplay between economic, political and social forces and the emerging clinical agendas. Six leading clinicians in major specialities discuss the import of new technology, economic, political and technographic changes on their specialty in 10, 20 and 50 years time.

**Black Skin, White Masks** Frantz Fanon 2017-05-09 Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

This comprehensive guide covers the theoretical foundations of various research methods, shows how to apply those methods in organizational settings, and examines the ethical conduct of research. It provides a holistic perspective, embracing quantitative, qualitative, and mixed-methodology approaches and illuminating them through numerous illustrative examples.

*Living with Bariatric Surgery* Denise Ratcliffe  
2018-03-20 *Living with Bariatric Surgery: Managing Your Mind and Your Weight* aims to help those who are considering bariatric surgery develop a psychological understanding of their eating behaviour and the changes

needed in order to make surgery successful. It is also a resource for those who have undergone surgery to help them adapt to the physical, psychological and relationship adjustments that occur. Whilst the benefits of bariatric surgery are significant, the psychological challenges it presents for patients have been overlooked. This book will help patients develop a realistic view of bariatric surgery and the changes required. It incorporates the real-life experiences of people who have had bariatric surgery, showing how they have responded to the psychological and behavioural changes after surgery, and also features helpful psychoeducation, exercises and strategies to facilitate reflection and learning. *Living with Bariatric Surgery* will be an essential guide for anyone considering, preparing for or recovering from bariatric surgery, as well as health professionals working with these clients.
