Russia and China Michal Lubina 2017-10-23 This book depicts the sophisticated relationship between Russia and China as a pragmatic one, a political “marriage of convenience”. Yet at the same time the relationship is stable, and will remain so. After all, bilateral relations are usually based on pragmatic interests and the pursuit of these interests is the very essence of foreign policy. And, as often happens in life, the most long-lasting marriages are those based on convenience. The highly complex, complicated, ambiguous and yet, indeed, successful relationship between Russia and China throughout the past 25 years is difficult to grasp theoretically. Russian and Chinese elites are hard-core realists in their foreign policies, and the neorealist school in international relations seems to be the most adequate one to research Sino-Russian relations. Realistically, throughout this period China achieved a multidimensional advantage over Russia. Yet, simultaneously Russia-China relations do not follow the patterns of power politics. Beijing knows its limits and does not go into extremes. Rather, China successfully seeks to build a longterm, stable relationship based on Chinese terms, where both sides gain, albeit China gains a little more. Russia in this agenda does not necessary lose; just gains a little less out of this asymmetric deal. Thus, a new model of bilateral relations emerges, which may be called – by paraphrasing the slogan of Chinese diplomacy – as “asymmetric win-win” formula. This model is a kind of “back to the past” – a contemporary equivalent of the first model of Russia-China relations: the modus vivendi from the 17th century, achieved after the Nerchinsk treaty.

Courtyard Housing for Health and Happiness Donia Zhang 2016-03-09 Health and happiness are fundamental to human quality of life. The United Nations World Happiness Report 2012 reflects a new worldwide call for governments to include happiness as a criterion to their policies. The Healthy Cities or Happy Cities movement has been endorsed by the WHO since 1986, and a Healthy House or Happy Home is a critical constituent of a healthy city or a happy city. Nevertheless, the concept has not been fully explored. Existing literature on the healthy house has often focused on the technical, economic, environmental, or biochemical aspects, while current scholarship on the happy home commonly centers on interior decoration. Few studies have addressed the importance of social and cultural factors that affect the health and happiness of the occupants. Identifying four key themes in Chinese philosophy to promote health and happiness at home, this book links architecture with Chinese philosophy, social sciences, and the humanities, and in doing so, argues that Architectural Multiculturalism is a vital ideology to guide housing design in North America. Using both qualitative and quantitative evidence gathered from ethnic Chinese and non-Chinese living in the USA and Canada, the study proposes that the Courtyard is a central component to promote social and cultural health and happiness of residents. It further details courtyard garden house design strategies that combine a sense of privacy with a feeling of community as represented in courtyard housing. The schemes may have universal implications.

Chinese Discourses on Happiness Gerda Wielander 2018-11-01 Happiness is on China’s agenda. From Xi Jinping’s “Chinese Dream” to online chat forums, the conspicuous references to happiness are hard to miss. This groundbreaking volume analyzes how different social groups make use of the concept and shows how closely official discourses on happiness are intertwined with popular sentiments. The Chinese Communist Party’s attempts to define happiness and well-being around family-focused Han Chinese cultural traditions clearly strike a chord with the wider population. The collection highlights the links connecting the ideologies promoted by the government and the way they inform, and are in turn informed by, various deliberations and feelings circulating in the society. Contributors analyze the government’s “happiness maximization strategies,” including public service advertising campaigns, Confucian and Daoist-influenced discourses adapted for the self-help market, and the promotion of positive psychology as well as “happy housewives.” They also discuss forces countering the hegemonic discourse: different forms of happiness in the LGBTQ community, teachings of Tibetan Buddhism that subvert the material culture propagated by the government, and the cynical messages in online novels that expose the fictitious nature of propaganda. Collectively, the authors bring out contemporary Chinese voices engaging with different philosophies, practices, and idealistic imaginings on what it means to be happy. Gerda Wielander is a professor of Chinese studies at the University of Westminster. Her research focuses on the link between the spiritual and the political in contemporary China. Derek Hird is a senior lecturer in Chinese studies at Lancaster University, UK. His research interests include gender and masculinities and mental health needs of Chinese migrants in London. “This distinctive volume creates sustained dialogues around a substantive debate. Rejecting the conventional contrasts between China and the West, and yet deeply immersed in sinophone media, the authors understand Chinese discourse on happiness as multiple but interconnected conversations within a globally shared production of knowledge. Equally concerned with text and image, they exhibit an ethnographic eye as sharp as any orthodox ethnography.” —Deborah Davis, Yale University “Wielander and Hird have put together a superbly researched and thoughtfully written set of essays on the multiple ways in which that most elusive of all states—happiness—is understood and pursued in contemporary China. A volume that should become required reading for all interested in Chinese society today.” —Julia C. Strauss, SOAS, University of London

The Chinese Pursuit of Happiness Becky Yang Hsu 2019-09-24 What defines “happiness,” and how can we attain it? The ways in which people in China ask and answer this universal question tell a lot about the tensions and challenges they face during periods of remarkable political and economic change. Based on a five-year original study conducted by a select team of China experts, The Chinese Pursuit of Happiness begins by asking if Chinese citizens’ assessment of their life is primarily a judgment of their social relationships. The book shows how different dimensions of happiness are manifest in the moral and ethical understandings that embed individuals in specific communities. Vividly describing the moral dilemmas experienced in contemporary Chinese society, the rituals of happiness performed in modern weddings, the practices of conviviality carried out in shared meals, the professional tensions confronted by social workers, and the hopes and frustrations shared by political reformers, the contributors to this important study illuminate the causes of anxiety and reasons for hope in China today.

The Routledge Handbook of Soft Power Naren Chitty 2016-11-03 The Routledge Handbook of Soft Power is the first volume to offer a comprehensive and detailed picture of soft power and associated forms of public diplomacy. The terms soft power and public diplomacy have enormous currency in media and policy discourse, yet despite all the attention the terms remain conceptually ambiguous for analysts of international influence. The consequence is that the terms have survived as powerful, yet criticized, frames for influence. Divided into two main parts, Part I outlines theoretical problems, methodological questions, the cultural imperative and the technological turn within the study of soft power and Part II focuses on bringing the theory into practice through detailed discussion of key case studies from across the Americas, Europe, the Middle East, Africa and Asia. This innovative handbook provides a definitive resource for students and scholars seeking to familiarize themselves with cutting-edge debates and future research on soft power and will be of interest to those studying and researching in areas such as international relations, public diplomacy and international communication.

Chinese Immigration and Australian Politics Jia Gao 2020-07-14 This book analyses how an increasing number of new Chinese migrants have integrated into Australian society and added a new dimension to Australian domestic politics as a result of Australia’s merit-based immigration system and its shift towards Asia. These policies have helped Australia sustain its growth without a recession for decades, but have also slowly changed established patterns in the distribution of job opportunities, wealth, and political influence in the country. These transformations have recently triggered a strong Sinoophobic campaign in Australia, the most disturbing aspect of which is the denial of the successful integration of Chinese migrants into Australian society. Based on evidence gathered through a longitudinal study of Chinese migrants in Australia, this book examines the misconceptions troubling Australia’s current China debate from six important but overlooked perspectives, ranging from migration policy changes, economic factors, grassroots responses, the role of major political parties, community activism, to knowledge issues.

Rituals and Traditional Events in the Modern World Jennifer Laing 2014-10-30 Many events have evolved over centuries, drawing on local customs and conditions. However, as the world becomes increasingly globalised, traditional events and the identities they support are increasingly being challenged and rituals may be lost. Reacting against this trend towards homogeneity, communities strive to preserve and even recreate their traditional events, which may require rituals to be resurrected or reinvented for a new audience. The aim of this book is to explore the role of traditional events and rituals in the modern world. The 16 chapters cover a range of case studies of the performance of ritual through events, including their historical antecedents and development over time, as well as their role in society, link with identities both seemingly fixed and fluid and their continued relevance. The cases examined are not museum pieces, but rather vibrant festivals and events that continue to persist. Drawing on the power of history and cultural tradition, they are manifestations of heritage, existing in three temporalities: celebrating the past, occurring in the present and aiming to continue into and influence the future. Iconic events including Chinese New Year, Hogmanay and the New Orleans Mardi Gras are examined and examples are drawn from a diverse range of countries such as South Korea, China, Laos, the United States, Scotland, Italy, India and Haiti. This volume provides a deep understanding upon the role of tradition and ritual within events, from a global perspective and will be valuable reading for students, researchers and academics interested in events, heritage and culture.

K-pop - The International Rise of the Korean Music Industry JungBong Choi 2014-09-15 K-pop, described by Time Magazine in 2012 as "South Korea’s greatest export", has rapidly achieved a large worldwide audience of devoted fans largely through distribution over the Internet. This book examines the phenomenon, and discusses the reasons for its success. It considers the national and transnational conditions that have played a role in K-pop’s ascendancy, and explores how they relate to post-colonial modernisation, post-Cold War politics in East Asia, connections with the Korean diaspora, and the state-initiated campaign to accumulate soft power. As it is particularly concerned with fandom and cultural agency, it analyses fan practices, discourses, and underlying psychologies within their local habits as well as in expanding topographies of online networks. Overall, the book addresses the question of how far "Asian culture" can be global in a truly meaningful way, and how popular culture from a "marginal" nation has become a global phenomenon.

Chinese Politics in the Era of Xi Jinping Willy Wo-Lap Lam 2015-03-12 Renowned for his coverage of China’s elite politics and leadership transitions, veteran Sinologist Willy Lam has produced the first book-length study in English of the rise of Xi Jinping—General Secretary of the Chinese Communist Party (CCP) since November 2012. With rare insight, Lam describes Xi’s personal history and his fascination with quasi-Maoist styles, the factional politics through which he ascended, the configuration of power of the Fifth-Generation leadership, and the country’s likely future directions under the charismatic “princeling.” Despite an undistinguished career as a provincial administrator, Xi has rapidly amassed more power than his predecessors. He has overawed his rivals and shaken up the party-state hierarchy by launching large-scale anti-corruption and rectification campaigns. With a strong power base in the People’s Liberation Army and a vision of China as an “awakening lion,” Xi has been flexing China’s military muscle in sovereignty rows with countries including Japan, Vietnam, and the Philippines while trying to undermine the influence of the United States in the Asia-Pacific region. While Xi is still fine-tuning his art of governance, his zero tolerance for dissent and his preoccupation with upholding the privileges of the “red aristocracy” and the CCP’s status as “perennial ruling party” do not bode well for economic, political, or cultural reforms. Lam takes a close look at Xi’s ideological and political profile and considers how his conservative outlook might shape what the new strongman calls “the Great Renaissance of the Chinese race.”

Migration and Performance in Contemporary Ireland Charlotte Mclvor 2016-10-10 This book investigates Ireland’s translation of interculturalism as social policy into aesthetic practice and situates the wider implications of this ‘new interculturalism’ for theatre and performance studies at large. Offering the first full-length, post-1990s study of the effect of large-scale immigration and interculturalism as social policy on Irish theatre and performance, Mclvor argues that inward-migration changes most of what can be assumed about Irish theatre and performance and its relationship to national identity. By using case studies that include theatre, dance, photography, and activist actions, this book works through major debates over aesthetic interculturalism in theatre and performance studies post-1970s and analyses Irish social interculturalism in a contemporary European social and cultural policy context. Drawing together the work of professional and community practitioners who frequently identify as both artists and activists, Migration and Performance in Contemporary Ireland proposes a new paradigm for the study of Irish theatre and performance while contributing to the wider investigation of migration and performance.

Places for Happiness William Peterson 2016-02-29 Places for Happiness explores two of the most important performance-based activities in the Philippines: the processions and Passion Plays associated with Easter and the mass-dance phenomenon known as “street dancing.” The scale of these handcrafted performances in terms of duration, time commitment, and productive labor marks the Philippines as one of the world’s most significant and undervalued performance-centered cultures. Drawing on a decade of fieldwork, William Peterson examines how people come together in the streets or on temporary stages, celebrating a shared sense of community and creating places for happiness. The first half of the book focuses on localized and often highly idiosyncratic versions of the Passion of Christ. Peterson considers not only what people do in these events, but what it feels like to participate. The book’s second half provides a window into the many expressions of “street dancing.” Street dancing is infected by localized indigenous and folk dance traditions that are reinforced at school and practiced in conjunction with religious civic festivals. Peterson identifies key frames that shape and contain the individual in the Philippines, while tracking how the local expands its expressive home by engaging in a dialogue with regional, national, and diasporic Filipino imaginaries. Ultimately Places for Happiness explores how community-based performance responds to and fulfills basic human needs. Many Filipinos rely on family members and immediate neighbors for support and sustenance, and community-based performance assumes a unique and leading role in defining, reinforcing, and celebrating shared belief systems. By bringing forth the internal, phenomenological, and embodied aspects of a range of community-based practices contributing to human happiness, the book offers a cultural framework that interweaves the individual experience with that of the collective, plotting out what resides inside the body through the coordinates of culture.

Minority Stages Josh Stenberg 2019-08-31 Minority Stages: Sino-Indonesian Performance and Public Display offers intriguing new perspectives on historical and contemporary Sino-Indonesian performance. For the first time in a major study, this community’s diverse performance practices are brought together as a family of genres. Combining fieldwork with evidence from Indonesian, Chinese, and Dutch primary and secondary sources, Josh Stenberg takes a close look at Chinese Indonesian self-representation, covering genres from the Dutch colonial period to the present day. From glove puppets of Chinese origin in East Java and Hakka religious processions in West Kalimantan, to wartime political theatre on Sumatra and contemporary Sino-Sundanese choirs and dance groups in Bandung, this book takes readers on a tour of hybrid and diverse expressions of identity, tracing the stories and strategies of minority self-representation over time. Each performance form is placed in its social and historical context, highlighting how Sino-Indonesian groups and individuals have represented themselves locally and nationally to the archipelago’s majority population as well as to Indonesian state power. In the last twenty years, the long political suppression of manifestations of Chinese culture in Indonesia has lifted, and a wealth of evidence now coming to light shows how Sino-Indonesian groups have long been an integral part of Indonesian culture, including the performing arts. Valorizing that contribution challenges essentialist readings of ethnicity or minority, complicates the profile of a group that is often considered solely in socioeconomic terms, and enriches the understanding of Indonesian culture, Southeast Asian Chinese identities, and transnational cultural exchanges. Minority Stages helps counter the dangerous either/or thinking that is a mainstay of ethnic essentialism in general and of Chinese and Indonesian nationalisms in particular, by showing the fluidity and adaptability of Sino-Indonesian identity as expressed in performance and public display.
